NODE CATEGORIES OUT OF THE BOX

DAG

VISUAL PIPELINE DESIGNER

TietAI Agentic Studio lets healthcare IT teams design complex agentic workflows — EHR integrations, clinical AI pipelines, prior-auth automation — without writing code. Everything from ingestion to deployment is composed visually, versioned, and monitored in real time.

#### WHAT YOU GET

- 01 **Visual DAG designer.** Drag-and-drop pipelines with branching, loops, and conditional routing.
- 02 **94+ healthcare nodes.** EHR, FHIR, HL7, DICOM, LLM, RAG, transformation, and validation primitives.
- 03 **Template library.** Reusable pipeline patterns for common clinical workflows.
- 04 **Live monitoring.** Real-time execution traces, metrics, and error analysis per run.
- 05 **Agent management.** Create, configure, and deploy AI agents with guardrails.
- 06 **Team collaboration.** Multi-project organisation with role-based access.

#### IDEAL FOR

CIO

VP Engineering

Integration Architects

#### KEY USE CASES

- Prior-authorisation automation
- Clinical data pipelines
- Claims processing workflows
- Care coordination automation

#### DIFFERENTIATOR

*The only visual healthcare pipeline builder with agentic AI nodes — no code required.*

#### DEPLOYMENT

Cloud · On-premise · Hybrid
