

## COMPLIANCE &amp; GOVERNANCE

# EHDS-ready. In weeks, not 18 months.

## WHY IT MATTERS

European hospitals face the 2027 EHDS compliance deadline with fragmented metadata, manual governance workflows, and no clear operational route to readiness. TietAI EHDS turns existing research datasets into a governed workspace with HealthDCAT-AP schemas, SHACL validation, GDPR-aware controls, and cross-border catalogue federation.

## HealthDCAT-AP R5

Metadata schemas, out of the box

## SHACL validation

Compliance checks automated

## HDAB integration

RDF federation across access bodies

## In practice

A university hospital group centralizes research datasets, validates metadata automatically, and publishes governed catalogues for cross-border collaboration through a single EHDS workspace.
